PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, user-focused web applications using React.js, JavaScript, and Tailwind CSS. Proficient in MERN stack development, feature-based architecture, Redux Toolkit state management, and RESTful API integration. Strong understanding of component-based design, clean code practices, and performance optimization — with a focus on delivering accessible, production-ready interfaces.

TECHNICAL SKILLS

Languages : Python, Database (MongoDB, MySQL), JavaScript
Frontend : React,Html,Css, Bootstrap, Tailwind
Backend :Node, Express, JWT, REST APIs, Mongoose
Tools :Figma, Postman, Github,

CERTIFICATES

Cyber Security : ICT Academy, PaloAlto.
Machine Learning :Cetpa.
Full Stack Development :Ensino.

EDUCATION

Uttrakhand technical University **B.tech in Computer Science** | CGPA : 7.2 2020 – 2024

INTERSHIP

Frontend Developer(Intern) | VerveGen Tech Pvt. Ltd. July 2023 – September 2023

- Reduced development time for new features by 15% by working closely with developers on clarifying re- quirements and streamlining the development process.
- Actively participated in code reviews, and daily stand-up meetings, providing clear and concise updates on project progress and identifying potential roadblocks.
- Collaborated with designers and developers on the development of 5 web applications, streamlining the development process and reducing project completion time by 20%.

PROJECTS

JobTracker — Full-Stack Job Application Tracker React.js| Node.js/Express.js | MongoDB | Redux Toolkit | Tailwind CSS

- Built a full-stack job tracking web application with separate frontend (React 18 + Vite) and backend (Node.js + Express) architecture, covering 100% of the MERN stack.
- Implemented JWT authentication with dual-token strategy (access + refresh tokens), securing all protected API routes via custom middleware.
- Integrated Redux Toolkit for centralized state management and React Hook Form for form handling, reducing re-renders and improving form performance.
- Designed 6+ RESTful API endpoints for full CRUD operations on job applications, with server-side validation using express-validator.

Personal Portfolio Website | Reac|Tailwind CSS|Framer Motion|EmailJS|Vite

- Built a fully responsive, modern portfolio with smooth animations using Framer Motion across all sections.
- Integrated EmailJS for a functional contact form with real-time email delivery (no backend required).
- Implemented resume download feature and dynamic project showcase section.

Bazario — Modern Ecommerce Frontend React 18 | Tailwind CSS | Redux Toolkit | React Router v6 | React Hook Form

- Developed a production-grade ecommerce frontend with 8+ feature modules (auth, cart, wishlist, checkout, products, account, dashboard, footer) following a scalable feature-based architecture.
- Built advanced product discovery with category/subcategory browsing, multi-parameter filtering (Price, Size, Material), and AI-powered review summaries on product detail pages.
- Optimized application performance using React.lazy + Suspense for route-level code splitting, reducing initial bundle load time by 30–40%.
- Integrated react-helmet-async for dynamic SEO meta tags across all pages, improving search engine discoverability.
